Our Department Alumni

Cameron Feldman
Hexcel Corporation

Friday, April 10th 2015 @ 2.00 pm
In Conant Lecture Room 278

Bridgewater State University Alumni Cameron Feldman who has done extremely exciting – nonlinear- things in his successful adventures after Physics. He worked in industry, got prestigious MBA from BU and is now traveling the country and world in executive business training program.

He will discuss the path taken since graduation, and some of his more notable projects, such as converting asphalt into massive solar thermal collectors dubbed the "Roadway Power System," invention of "The Anywhere Bottle" a mobile Photovoltaic water sanitizer, and using his analytical skills to evaluate businesses in the high stakes game of Mergers and Acquisitions.
