

# IT Authorized Network Services Policy

<b>Purpose</b>	Certain electronic services are more critical to the functioning of the University infrastructure than others. Therefore, network services are exclusive to the Information Technology Division.
<b>Policy Statement</b>	All network services on a computer which connects to the production network of the University must either be installed or approved by the Information Technology Division.
<b>Applies to</b>	All computers that connect to the production network of the University.
<b>Responsibilities</b>	IT staff will periodically scan the production network and notify the computer's custodian to begin either the waiver or remediation process.

Examples of network services include, but are not limited to:

- Web servers
- FTP servers
- DNS servers
- Database servers (SQL, Oracle, et cetera)
- SMTP/Mail Servers
- SSH or Telnet servers

To request a waiver, please submit a request to [itsupport@bridgew.edu](mailto:itsupport@bridgew.edu)
