

Connecting Vendor Owned Computers

Purpose	This policy is to notify University vendors the requirements for utilizing the BSU network.
Policy Statement	All non-University computers will be required to meet minimum standards for security before being allowed to connect to the University network.
Applies to	All University vendors' computers that connect to the BSU network.
Responsibilities	<p>University vendor's computers have not been subject to University policy and procedures that protect the integrity of the network infrastructure. Because these computers don't follow University standards (Windows updates, running anti-virus software, etc.) there is increased risk of virus propagation as well as the potential to create performance problems on the University production network.</p> <p>All computer users will be required to acquire and use a BSU account,</p> <p>All computer users will be required to sign the University Acceptable Use policy,</p> <p>All computers will be scanned for vulnerabilities and viruses before being allowed on the network</p> <p>Internet bandwidth will be provided for business use only.</p>
